

I am opposed to the FCC's plan to expand the LPFM service, in effect overtaking current FM stations that rebroadcast on local translators. Specifically, this will affect the 2 radio stations that I listen to the most and support wholeheartedly. These 2 stations are K-LOVE and Air-1. These stations benefit me and my family with a positive and encouraging message that is not contaminated with filth that is so prevalent with mainstream radio broadcasting. There would be a moral void on the radio waves if these stations were to be displaced by some other sort of broadcasting station that did not have such high broadcasting standards. I believe that the service provided by K=LOVE and Air-1 is in the public interest as there are very few alternative radio stations that adhere to a high moral standard (Something that is clearly lacking in our country). These stations serve the community with a positive message, clean commentary, and christian perspective on local and national news. Please so not expand the LPFM stations
